

## Nureva™ Span™ ideation software

Span software draws upon the familiar and flexible tools you're already using for paper-based ideation. Create ideas on your personal devices and share them on the team canvas in the cloud.

### Canvas

Capture, organize and refine ideas in this expansive team workspace just as you would work with stickies, flip charts and pictures on a wall. Teams can work in a 10' or 20' (3.1 or 6.1 m) digital space and pan horizontally over a total of 40' (12.2 m). A subtle background helps contributors stay oriented within the digital space as they add and organize their digital artifacts.

### Digital artifacts

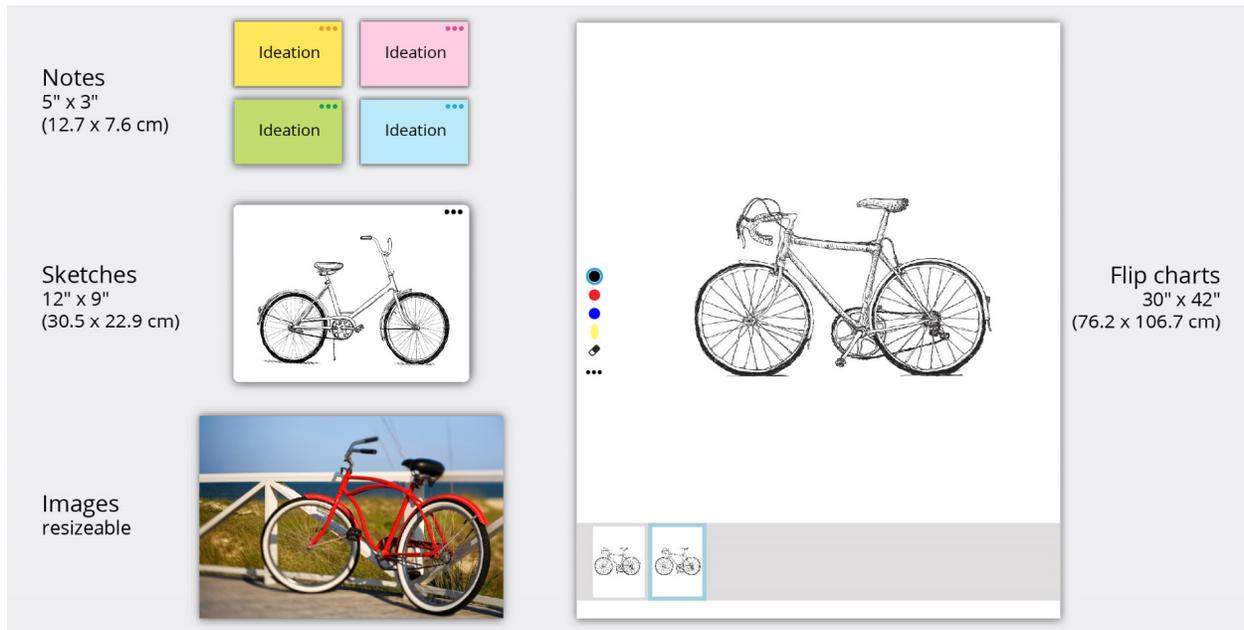

Express ideas as different types of digital content, each with specific functionality. Notes mimic paper sticky notes for rapid-fire ideation. Sketches are ideal for drawing and wire-framing. Flip charts make it easy to park ideas or capture action items. Images provide visual inspiration. All can be moved, edited, duplicated and grouped as needed.

### Personal apps

Access the canvas through Chrome browsers or apps on iOS and Android tablets. Create a collection of digital artifacts and store them in your tray while editing. Drag them onto the canvas when ready to share. Synchronous and asynchronous inputs are possible from all team members, whether colocated or working at a distance.

### Cloud software

Contribute to your ideation sessions anytime, anywhere, as often as needed. Everyone contributes in real time so the canvas is up-to-date, and because you have a subscription, your software always has the latest features. Ideation and collaboration can be planned or ad hoc. Work is never lost.

## Features

Note	Enter text into a digital note that resembles a standard sticky note. Duplicate, delete and change color, or convert into a heading for a group.
Sketch	Create a virtual page that simulates a standard piece of paper. Sketch in three colors, highlight and erase.
Image	Import images in any standard format at any resolution. Resize, pin and rotate directly on the canvas.
Flip chart	Insert a digital workspace that has the same form factor as a paper flip chart. Add multiple pages, write in three colors, highlight and erase.
Group	Create a heading to form a group box. Resize the borders to capture ideas, or pin in place and drag notes, sketches, images and even other groups in and out.
Export	Export the canvas as a PDF or an Excel® file.

## Minimum operating requirements

Room software	Windows® OS 8.1
Device apps	Android™ OS 4.4+, iOS 8.1+
Web client	Chrome™ browser v.44
